

Reduce Production Time & Costs Whilst Improving the Look & Durability of your Outdoor Timber Projects

PROTECTIVE OILING SERVICE

With a combination of harsh weather conditions, the cost & time to produce outdoor decking, flooring, walking paths & fencing, it is extremely important to provide your timber projects with weather resistance, durability & strength.

To slow down the degrading action of weather & minimise moisture intake it is recommended that timber decking, screening, panelling & cladding is treated with specific oils before installation.

At 5 Star Timbers, we understand that this can be a tiresome, time consuming & costly process, that's why 5 Star Timbers Pre-Installation Protective Oiling Service is perfect for you.

Stapylton 07 3386 1055

Woodridge 07 3386 0595

Developed in conjunction with  &  to specifically benefit Outdoor Timber in Queensland's tough climate

Keep DOLLARS in your Pocket & Sanity on the Job Site
TIMBERS DECKS SHOULD BE PRE-OILED PRIOR TO INSTALLATION

PROTECTIVE OILING SERVICE

Prior to installing decking boards they should be coated on all faces, edges & ends with a quality penetrating oil.

5 Star Timbers Protective Oiling Service ensures that your timber is oiled on all four sides & both ends, with a sealer coat of Feast Watson Traditional Timber Oil which will enhance the longevity of your timber & reduce mould & fungus attack.

Definitely a cost effective option worth considering when you order decking, screening, panelling & or cladding from us.
